## FIRE STATION #2 UNDER CONSTRUCTION

Work has begun on construction of the Village's second fire station on Sand Sage Road west of Interstate 25.

T.A. Cole and Sons, an Albuquerque general contractor, has been awarded the job to construct the Village's second station for \$4.4 million including gross receipts tax.

Fire station #2 will be built on 2.3 acres purchased by the Village in 2006.

The facility will have five bays, six dorms, laundry room, training room, offices, exercise area, kitchen, bathrooms, a decontamination area, an EMS station, and a triage area for walk-in emergencies.

Funding for the station comes from a \$5.8 million mill levy approved by Village voters in March 2016.

A new ladder truck will also be purchased with the mill levy funds.

Fire Chief John Gabaldon has said the ladder truck will run about \$960,000.

A ladder truck will allow firefighters to more effectively fight multi-story structure fires, and get water to the center of fires, which will help contain those fires.

Molzen Corbin Architect John Pate said the new fire station is designed to be serviceable long into the future.

## SIGN UP FOR ALERT SENSE

The Valencia Regional Emergency Communications Center (VRECC) is using a new comprehensive emergency alert and notification system powered by AlertSense.

The system allows the VRECC to send emergency alerts, severe weather warnings, and community notifications that affect you. This free service makes it easy to receive alerts.

To sign up for AlertSense and receive these emergency notifications from VRECC, please visit <http://www.loslunasnm.gov/vrecc> and click on the link to sign up.

Previously, VRECC used the CodeRED service for emergency alert notifications.

However, due to a large cost savings and the gaining of new functionality, a decision was made to change to the new AlertSense service.

If you had previously signed up to receive emergency notifications through the CodeRED service, you will need to sign up for the new AlertSense.

Lots of construction continues near the recycling area on Don Pasqual so be careful when in that vicinity.

Work continues on improvements to the Fred Luna Multigenerational Center as well as construction of the Valencia Regional Emergency Communication Center in the general area of the recycling center.

The publication Where to Retire has released "The Short List: 50 Best Master-Planned Communities in the United States," and Jubilee Los Lunas is on the list.

The July/August Where to Retire issue is on newsstands now.

The list is the only one of its kind, focusing on communities rather than locales and featuring first-person testimonials by current residents.

Jubilee Los Lunas is the only master-planned community in New Mexico to be recognized this year.

The selected 50 best master-planned communities showcase the variety of housing options and amenities that enrich the lives of retirees.

The communities come from 18 states.

Twenty-one developments are active-adult communities where residents must meet minimum age requirements.

The communities are listed alphabetically by state and then by development name. They are not ranked.
